Koi fishes and Gold fishes with concentration higher than 5 cm for 100 liters

Gold fishes with concentration lower than 5 cm for 100 liters

HOW IT WORKS

FILTRATION

EASY CLEAN TECHNOLOGY

3 stage cleaning:

- mechanical (sponges),
- biological (bio balls),
- sterilization (UV lamp)

1. Water inlet - dirty water is pumped from the pond to the pressure filter
2. Mechanical filtration captures dirt and debris providing superior water quality
3. Bio balls promote and preserve of needed beneficial bacteria after each cleaning (not included in Green Reset 60-100)
4. UVC lamp eliminates green water and reduces algae
5. Water outlet - clean water goes back to the pond
6. Backwash function switch
7. Cleaning level for easy and effective cleaning:
NO NEED TO OPEN THE FILTER!
8. UV light indicator
9. Drain outlet (backwash/cleaning)

Max pressure	0,4 bar - 5,8 PSI	0,4 bar - 5,8 PSI	0,4 bar - 5,8 PSI	0,4 bar - 5,8 PSI

FOCUS ON

- 3 STAGE CLEANING: mechanical (sponges), biological (bio balls) and sterilization (UV lamp).
- Extremely user-friendly thanks to the "Easy Clean Technology".
- Ideal to create waterfalls thanks to the high pressure in the output.
- Sealed pressure container: thus the filters can be almost completely buried in the ground.
