

HALLEY

Submersible pond Light

HALLEY is a completely watertight submersible lamp for ponds and fountains. Its reduced dimensions allows it can fit in the smallest ponds and fountains, maintaining an high power and luminous beam depth thanks to the high-luminosity dicroic bulb. Its ergonomic and functional design make easy any kind of positioning.

HALLEY is supplied, in the basic configuration, with a standard equipment comprising a halogenous spotlight with a white light and three coloured lenses that may be rapidly exchanged, power cable and safety transformer complying with directives EEC 89/336 and EEC 73/23.

With coloured lenses

HALLEY's power gives a large light intensity by a precise and concentrated strip.
