

Syncra SDC PSK SDC

PUMP CONFIGURATION

CONTRALL

FREE DOWNLOAD

SICCE CLOUD

sicce.zepping.it

Use your ContrALL account
to log in.

STEP 1

Download the APP in your smartphone.
Create your account in the APP. Do not use any symbols like: “/(=;&
Connect the CONTROLLER to the power adapter.

After some minutes the CONTROLLER creates a WIFI network called **“SICCE(*****)”**

STEP 2

Press the  **ON/OFF KEY** on the controller to switch it on. Once started, the configuration should be completed within 5 minutes. If it takes longer it could be that at STEP 4 you do not see SICCE Network.

STEP 3

In **SETTINGS**, open **Wi-Fi**

SICCE controllers are compatible with WiFi 2.4Ghz networks. Please check this detail before proceeding.

STEP 4

Select **SDC pump's network**.

If the network doesn't appear, wait for 30 seconds then repeat the network search.

STEP 5

Write the password: **sicceitaly**

STEP 6

Connect.

STEP 7

Wait:
the system is processing data..

STEP 8

Press on "Configure WiFi"
when the screen appears..

With **Android** you should open
192.168.4.3 (the IP address)
on your browser to reach this
screen.

In the configuration page you
can see 4 different option:

1. Configure Wi-Fi: this section
allows the connection of your
Syncra Smart Pump to internet
(use this section for connecting
your Syncra Smart Pump).

2. Configure Wi-Fi (No Scan):
through this section you'll be able
to connect your Syncra Smart
Pump to the internet **without**
the network selection (Only
PRO-User).

3. Info: Contains some generic
information of the hardware
used for the connection.

4. Reset: Allows the Syncra
connection settings to be reset
and restores them to factories
settings.

STEP 9

Click on your **network**, on the top of the page..

If your network does not appear in the list there might be reasons:

- 1st : the signal is too low
- 2nd: the network is 5 Ghz and not 2.4 Ghz as the one we need.

STEP 10

Type the **password** related to it..

STEP 11

Insert your **APP ContrALL login & password** (you have set your account the first time you opened ContrALL App).

Give a **name** to your SDC pump (for example "My pump 1").

STEP 12

Press **SAVE**.

STEP 13

If you see this screen, **wait** few seconds.

STEP 14

Open **ContrALL** App and you will see the pump.
